HANDBOOK
OF
AGRICULTURAL STATISTICS
PART I - FIELD CROPS

HISTORICAL SERIES
OF
Acreage, Production and Value, by Provinces, of
Canada's Principal Field Crops with Supplemen-
tary Data on Supply and Disposition of the
Major Grain Crops
Crop Years 1908-09 - 1958-59

Published by Authority of
The Honourable Gordon Churchill, Minister of Trade and Commerce

September, 1959
5502-510

Price \$2.00

P R E F A C E

This report is intended to supersede 'Handbook of Agricultural Statistics, Part I -- Field Crops', issued May, 1951 and the supplement to that reference paper issued November, 1955. The major purpose of the Handbook is two-fold:

- (1) to provide in one convenient publication, estimates for the period 1908 to 1958
- (2) to provide revised estimates for the 1951-56 period. Many of the series for this period were revised when new benchmarks were provided by the 1956 Census of Agriculture.

Subsequent issues of the Bureau's crop reports should be used to bring up-to-date estimates of acreage, production and value.

While it is not feasible to include a detailed treatment on statistical techniques in a publication of this type, the following notes may be of interest to users in interpreting the various estimates.

Source of Statistics: Official field crop statistics are obtained from several sources among which are --

- (1) The Census of Agriculture.
- (2) Mail questionnaire sample surveys undertaken by the Agriculture Division of the Dominion Bureau of Statistics in co-operation with statistical offices of provincial departments.
- (3) Other government departments and agencies including the Federal and Provincial Departments of Agriculture, the Board of Grain Commissioners and the Canadian Wheat Board, who in the course of their work voluntarily make available to the Dominion Bureau of Statistics much information of a statistical nature.
- (4) Processing firms, trade associations and marketing boards who willingly provide statistics on acreage, production and value of certain crops.
- (5) Other divisions of the Dominion Bureau of Statistics who provide basic data relative to the trade in, and processing of, agricultural commodities.

Rounding Area With the exception of sugar beets for which measured data are available, estimates of area are rounded to the nearest thousand for acreages of 100,000 and over, to the nearest hundred for acreages under 100,000.

Production With the exception of sugar beets, production estimates are normally rounded to the nearest thousand units.

Total Farm Value These estimates are rounded to the nearest thousand dollars.

Due to rounding, the sum of the provincial totals may not balance exactly with regional or all Canada totals. For the same reason, average yields per acre multiplied by the acreage of any crop may not be exactly equal to the production figure nor will average farm price multiplied by production necessarily balance exactly with the gross farm value.

Crop Year For wheat, oats, barley, rye and flaxseed, the crop year begins on August 1 for the years 1924-25 to date, and on September 1 for 1908-09 to 1923-24. The potato crop year begins on July 1 for the entire period. For all other crops, the crop year begins on August 1 throughout the period.

Average Farm Price The average price received by farmers for all grades and qualities of each crop.

^{1/} Most of the soybean crop is grown in Ontario but there were also small acreages in other provinces in the years 1942-43 to 1945-46. The totals for Canada include this production but provincial data are not shown in this handbook.

^{1/} Estimates are not available for small acreages which were grown in Alberta and Ontario between 1943 and 1945.

^{2/} F.O.B. shipping point price for rapeseed in reasonably clean condition, moisture content not exceeding limits determined by the Canadian Wheat Board. Average farm price for all grades not available. Order in Council No. P.C. 2894, dated April 9, 1943, empowered the Canadian Wheat Board to purchase rapeseed at fixed prices during this period.

^{1/} Includes 7,600 acres planted in Saskatchewan in 1943, which yielded 320 pounds per acre, and 500 acres in Alberta, which yielded 190 pounds. In 1944 some 6,500 acres were planted in Saskatchewan and yields were 475 pounds while in 1945, some 700 acres were seeded and the yield per acre was 508 pounds. Small acreages for which estimates are not available have been grown in Saskatchewan since that time. In Alberta in 1958 production was again undertaken and 3,700 acres were planted and yields amounted to 750 pounds per acre.

^{2/} F.O.B. shipping point price for No. 1 Canada Western Sunrise or similar quality. Average farm price for all grades and varieties not available. Order in Council No. P.C. 2894, dated April 9, 1943 empowered the Canadian Wheat Board to purchase sunflower seed at fixed prices during this period.

1959-60											
1960-61											
1961-62											

1/ The figures shown are not entirely comparable. Canadian carry-in figures for 1922 and 1923 do not include grain afloat in Canadian Lake and St. Lawrence Ports, rail transit in these years being reported only. From 1922 to 1931, grain afloat to U.S. Ports was not reported. Stocks of Canadian grain in U.S. Lake and Seaboard Ports from 1922 to 1931 are not exact month-end figures, but rather are for the week-end nearest the crop year end. Stocks on farms are included in all years.

2/ Conversion factor: prior to 1955-56, 1 barrel of 196 pounds of flour equivalent to 4.5 bushels of wheat and from 1955-56, 2.3 bushels per cwt.

3/ From 1955-56 includes bagged seed wheat.

4/ Total supply less exports and carryover at end of crop year.

5/ Less than 500 bushels.

1959-60											
1960-61											
1961-62											

1/ The figures shown are not entirely comparable. Canadian carry-in figures for 1922 and 1923 do not include grain afloat in Canadian Lake and St. Lawrence Ports, rail transit in these years being reported only. From 1922 to 1931, grain afloat to U.S. Ports was not reported. Stocks of Canadian grain in U.S. Lake and Seaboard Ports from 1922 to 1931 are not exact month-end figures, but rather are for the week-end nearest the crop year end. Stocks on farms are included in all years.

2/ Conversion factor: prior to 1954-55, 16.5 (beginning with 1954-55, 18.2) pounds of rolled oats and oatmeal equivalent to 1 bushel of oats.

3/ Total supply less exports and carryover at end of crop year.

4/ Less than 500 bushels.

1959-60												
1960-61												
1961-62												

1/ The figures shown are not entirely comparable. Canadian carry-in figures for 1922 and 1923 are for stocks in Canadian Lake and St. Lawrence Ports, rail transit in these years being reported only. From 1922 to 1931, grain afloat to U.S. Ports was not reported. Stocks of Canadian grain in U.S. Lake and Seaboard Ports from 1922 to 1931 are not exact month-end figures, but rather are for the week-end nearest the crop year end. Stocks on farms are included in all years.

2/ Conversion factor: 1 bushel (36 pounds) of malt equivalent to 1 bushel of barley.

3/ From 1926-27 includes pot and pearl barley. Conversion factor: prior to 1954-55, 20.5 (beginning with 1954-55, 23.3) pounds of pot and pearl barley equivalent to 1 bushel of barley.

4/ Beginning with January 1948 includes pot and pearl barley. Same conversion factors as above.

5/ Total supply less exports and carryover at end of crop year.

6/ Less than 500 bushels.

1961-62											

^{1/} The figures shown are not entirely comparable. Canadian carry-in figures for 1922 and 1923 do not include grain afloat in Canadian Lake and St. Lawrence Ports, rail transit in these years being reported only. From 1922 to 1931, grain afloat to U.S. Ports was not reported. Stocks of Canadian grain in U.S. Lake and Seaboard Ports from 1922 to 1931 are not exact month-end figures but rather are for the week-end nearest the crop year end. Stocks on farms are included in all years.

^{2/} Conversion factor: prior to 1954-55, 5.7 (beginning with 1954-55, 4.8) bushels of rye equivalent to 1 barrel of 196 pounds of rye flour.

^{3/} Discontinued from 1949-50.

^{4/} Total supply less exports and carryover at end of crop year.

^{5/} Less than 500 bushels.
